Abstract. The incidence of phloem sap feeding by animals appears paradoxical. Although phloem sap is nutrient-rich compared with many other plant products and generally lacking in toxins and feeding deterrents, it is consumed as the dominant or sole diet by a very restricted range of animals, exclusively insects of the order Hemiptera.

Phloem-sap feeding by animals: problems and solutions ...

In an essay that argues for a cause, you can talk about what created the problem and then discuss some possible solutions at the end of the essay, but in a Problem Solution essay, you get to spend a lot of time talking about the details of the solution and arguing for why that solution is the best, most efficient, and most feasible.

The medicinal use of plants, animals and microorganisms has been a part of human evolution and likely began before recorded history. Is it possible that this knowledge can be used to create powerful new drugs and solve some of the human health problems facing us today? This book is a collection of an expert team of agronomists, chemists, biologists and policy makers who discuss some of the processes involved in developing a naturally-sourced bioactive compound into a drug therapy. These experts define a natural compound and elucidate the processes required to find, extract and define a naturally-derived bioactive molecule. Finally, they describe the necessity for understanding the fundamental mechanisms of disease before applying bioactive molecules in bioassay-guided drug discovery platforms.

With lots of examples and color images, this resource is both a foundational text and a practical guidebook for bringing contemporary art into elementary and middle school classrooms as a way to make learning joyful and meaningful for all learners. Marshall shows how asking questions and posing problems spark curiosity and encourage learners to think deeply and make meaningful connections across the curriculum. At the center of this approach is creativity, with contemporary visual art as its inspiration. The text covers methods of creative inquiry-based learning, art and how it connects to the "big ideas" addressed by academic domains, flexible structures teachers can use for curriculum development, creative teaching strategies using contemporary art, and models of art-based inquiry curriculum. Book Features: Provides research-based project ideas and curriculum models for arts integration. Shows how Project Zero's flexible structures and frameworks can be used to develop creative inquiry and an arts integration curriculum. Explains how contemporary visual art connects to the four major disciplines-science, mathematics, social studies, and language arts. Includes full-color images of contemporary art that are appropriate for elementary and middle school learners. Demonstrates how arts integration can and should be substantive, multidimensional, and creative.
