Most of the literature on product realization is scattered in blogs, individual chapters of books, and internal company documents. Until now, there has been no single text that covers the whole launch process from end-to-end. The challenge of product realization is the interactions between the various activities and deliverables. Product Realization is based on first-hand experience with many companies comprising different sizes, technologies, and product development timelines. This book brings together fundamental theories and product development tools with the reality of what it takes to work in industry. Includes examples and stories from industry to illustrate and bring the material alive.

Vols. for 1970-71 includes manufacturers' catalogs.

An illustrated guide to wooden boat construction using WEST SYSTEM epoxy by pioneers in the field of wood/epoxy composite construction. Subjects include Fundamentals of Wood/Epoxy Composite Construction, Core Boatbuilding Techniques, First Production Steps, Hull Construction Methods, and Interior and Deck Construction.

Prefabrication and Architecture, a manual about prefab architecture, is primarily written for the architect and construction professional. it is the only professional reference on prefab architecture, with information on the many facets of off-site construction. Prefabrication can allow for greater efficiency and precision, lessen environmental impact, and shorten construction cycles. Smith offers designers and construction professionals guidelines that rethink all stages of the design process in order to effectively utilize the fabrication process.
