File noting has been in the recent past, and still is, under heated discussion in the context of Right to Information Act, 2005. It has, thus, been drawing a lot of interest from all concerned. Basic note in a file is written by an Office Assistant/ Assistant Section Officer. A good note should properly define and analyse the problem; refer to relevant rules, regulations, policies and precedents; talk about alternative solutions; discuss implications of these various alternatives and then suggest a suitable solution and a draft reply. Noting and drafting has, therefore, always been a vital part of decision-making process in the Government. the quality of Noting and Drafting has deteriorated over the years. There is hardly any publication on the subject except for some references in the manuals of office procedures. Hence, this attempt. A book for Government Officials to Master Noting and Drafting. It is a comprehensive book which talks about various concepts, the significance, features of good and bad notings, and skilful drafts citing examples drawn from actual files. Different exercises, their solutions, and samples of some good file notings and useful drafts make this book valuable for all its readers.

This book has been written to explain some of the fundamental issues of public administration to a wide audience. The author, Emeritus Professor and former head of the Department of Political Science at The University of Hong Kong, has had many years experience in the study and teaching of public administration in both European and African states (in the 50s and 60s) and Asia (in the 70s and 80s).

By bringing together influential critics of neo-Aristotelian virtue ethics and some of the strongest defenders of an Aristotelian approach, this collection provides a fresh assessment of the strengths and weaknesses of Aristotelian virtue ethics and its contemporary interpretations. Contributors critically discuss and re-assess the neo-Aristotelian paradigm which has been predominant in the philosophical discourse on virtue for the past 30 years.  
Joel Kupperman provides an engaging introduction to theories of the good life by exploring the strengths and weakness of six simple statements of what a good life should be. Drawing on classic Chinese, Indian, Greek and Roman sources, Kupperman considers the various ways in which one might think about the values that are worth aiming for, and shows that no simple account can adequately express all that a good life can be.

\*Scientific studies of art and archaeology are a necessary complement to cultural heritage conservation, preservation and investigation. Nuclear techniques, such as neutron activation analysis, X ray fluorescence analysis and ion beam analysis, have a potential for non-destructive and reliable investigation of precious artefacts and materials, such as ceramics, stone, metal, and pigments from paintings. Such information can be helpful in repair of damaged objects, in identification of fraudulent artefacts and in the appropriate categorization of historic artefacts.\*--Page 4 of cover.

This text explains C++ and basic programming techniques in a way suitable for beginning students. It adapts to the syllabus created by the instructor rather than making you adapt to the book. The order in which the chapters and sections are covered can easily be changed without loss of continuity in reading the text.

This book examines trends in ageing societies and urban development before assessing the impact of ageing populations on urban areas and strategies for policy and governance. It includes 9 case studies.
