Introduction. In most sectors today, public, private, and nonprofit, the phenomenon of "good governance" has become an important goal as strategic plans and policy actions are put in to place. Ethics and ethics education are major factors in the achievement of that goal. In the field of public administration, the good governance concept includes the operational aspects of public agencies as well as the care and engagement of our citizens, all performed ethically and with good stewardship.

An important interest in public-administration ethics has been expressed in OECD member states since the 1990s in reaction to the development of New Public Management (NPM) reforms. However, the meanings attached to the ethical issue in a context of managerial modernization remain ambiguous depending on the country and / or time period studied.
