The author argues that the P3 model can successfully deliver public infrastructure goods and services, provided that certain key thresholds are met. The most important of which is effective risk transfer to the private sector.

The case for public-private partnerships in infrastructure

One promising approach is to partner with the private sector in financing and delivering infrastructure projects. In order to increase understanding and consideration of private-public partnerships (P3s) among public sector leaders, the Bipartisan Policy Center analyzed a number of P3 projects. We have laid out important lessons learned from these projects for public officials considering a P3 approach as well as a few core principles for success, drawing from the experiences of public and ...

Case Studies: Lessons from Public-Private Partnerships

Public-private partnership (PPP) in infrastructure is a relatively new experience in most developing countries of the Asian and Pacific region. Although many governments have considered various steps to promote PPPs in their countries, lack of capacity in the public sector remains to be one of the major problems in implementing PPP projects.

Compendium on Public Private Partnership in Urban ...

The Government of India defines a P3 as "a partnership between a public sector entity (sponsoring authority) and a private sector entity (a legal entity in which 51% or more of equity is with the private partner/s) for the creation and/or management of infrastructure for public purpose for a specified period of time (concession period) on commercial terms and in which the private partner has been procured through a transparent and open procurement system."

Public-private partnership - Wikipedia

Abstract. Abstract: Much of the public debate about public-private partnerships (P3s) has occurred through the lens of those who either oppose or support this increasingly popular method of delivering public infrastructure assets. Despite some scepticism in the academic literature, an analysis of the key arguments for and against P3s concludes that the P3 model can successfully deliver public infrastructure goods and services, provided that certain key thresholds are met.

Indo-Africa Summit panel calls for strong Public-Private ...

Abstract. This article questions the negative outlook on the democratic accountability in public-private partnerships (PPPs). It challenges this widely held perception in the literature with the empirical findings of a case study of Flemish school infrastructure (Belgium). A large design, build, finance, and maintenance (DBFM) programme is compared with the regular subsidizing system through the public agency AGIOn (Agency for School Infrastructure).
