Walden on Wheels: On the Open Road from Debt to Freedom

Nearing the end of his life, Enzo, a dog with a philosopher's soul, tries to bring together the family, pulled apart by a three year custody battle between daughter Zoe's maternal grandparents and her father Denny, a race car driver.

A biography of the fugitive slave turned "conductor" on the Underground Railroad describes Tubman's youth in the South, her escape to Philadelphia, her efforts to liberate slaves, and her work for the Union Army.

Matt Fitzgerald has already made a name for himself in the endurance sport community with books like 80/20 Running, How Bad Do You Want It? and Iron War. He is an accomplished amateur runner, but if he follows the training, nutrition and lifestyle of an elite runner, just how fast could he go? He is approaching his mid-forties, so the time to do this is now. He at last has the financial means to do nothing but train. He accepts the goodwill of a friend who will let him crash at his apartment in the running mecca of Flagstaff, Arizona, and convinces the coach of Northern Arizona Elite, one of the country's premier professional running teams, to let him train with a roster of national champions and Olympic hopefuls for an entire summer leading in to the Chicago Marathon. The results were astounding...Filled with a vibrant cast of characters, rigorous and gut-wrenching training, Matt's knowledgeable yet self-deprecating voice allows us to vicariously live out our own fantasies of having the opportunity to go all the way. Yet for the runners Matt trains with, it's no mere fantasy, but a calling and their individual stories enrich this inspiring narrative. Running the Dream is a chance for us all to experience a bit of this rarified and wild world, and to take away pieces of this amazing journey to try to achieve our own potential.

The average young adult in the US reads for about 7 minutes a day, and the figure isn't much higher in Britain. The last few decades have seen striking and nearly continuous falls in the amount of time individuals spend with books and other printed material. And, perhaps as a result, the average level of literacy in the British and US populations is declining: our ability to comprehend complex writing, long words or sophisticated expressions is less than it was a few decades ago. Very surprisingly, the rate of decline is fastest amongst the best educated segment of the population. Chris Goodall's readable and comprehensive book asks why this is happening. 'In an ever more demanding world' he inquires 'why is our ability to understand and use the written word in gradual but apparently relentless retreat?' Chris Goodall's 'The Future of the Word: Technology, culture and the slow erosion of literacy examines the striking but largely unnoticed evidence from around the world. Using the latest research results from neuroscientists, from academics who work on reading skills and from cultural analysis, Goodall brings his commitment to scrupulous research to demonstrate how modern society is making it almost impossible for people to engage in deep reading. Not only are people reading less but they now consume the written word in a more cursory and less reflective way. The author has lost control of the reader: we all tend to skip across the page, searching exclusively for what is relevant to us rather than trying to understand the writer's point of view or memorise her arguments. There is a strong tendency to say that this doesn't matter. We longer need to read and to learn because all the information that we could possibly need is instantaneously available to us through electronic gadgets. The argument of Goodall's book is that this complacency is mistaken. Reading deeply helps us develop a framework and an intellectual structure to which we can add new ideas or opinions. The internet gives us orphaned facts but the reading of books or long articles gives us understanding. As importantly, deep reading trains our brains to cope with complex ideas, much as an athlete trains his muscles with repeated exercise. Goodall discusses the convincing scientific evidence that truly proficient literacy, a skill which is in sharp decline, helps improve other cognitive capabilities and may even improve IQ. If we don't go to the literacy gym often enough, he says, our intellectual capabilities suffer. Chris Goodall is a well known writer on climate change and energy, winning awards for his previous books and he is a regular commentator on scientific issues in newspapers in the UK and abroad. In an earlier part of his career he worked in television and other mass media. This book comes out of his fascination with how electronic technologies are affecting the way we think and live. 'Although the digital revolution has made life easier and has improved many of our cognitive skills', he says 'it is reversing our ability to read and to comprehend complex ideas'. Full of engaging reports of cutting-edge science, surprising and informative analysis and written with clarity and pace, Chris Goodall's 'The Future of the Word' is the first attempt to bring rigour to questions that many of us worry about it: why do we find it more difficult to concentrate on the written word? And what can we do about it?

Counted among his admirers are Jonas Salk, Aldous Huxley, David Hockney, and Van Morrison, along with countless other philosophers, artist, writers and students of the spiritual path. Now the trustees of Krishnamurti's work have gathered his very best and most illuminating writings and talks to present in one volume the truly essential ideas of this great spiritual thinker.Total Freedom includes selections from Krishnamurti's early works, his 'Commentaries on Living', and his discourses on life, the self, meditation, sex and love. These writings reveal Krishnamurti's core teachings in their full eloquence and power: the nature of personal freedom; the mysteries of life and death; and the 'pathless land', the personal search for truth and peace. Warning readers away from blind obedience to creeds or teachers – including himself – Krishnamurti celebrated the individual quest for truth, and thus became one of the most influential guides for independent-minded seekers of the twentieth century – and beyond.

In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. • A New Republic Best Book of the Year • The Globalist Top Books of the Year • Winner of the Maine Literary Award for Non-fiction • Particularly relevant in understanding who voted for who in this presidential election year, this is an endlessly fascinating look at American regionalism and the eleven "nations" that continue to shape North America According to award-winning journalist and historian Colin Woodard, North America is made up of eleven distinct nations, each with its own unique historical roots. In American Nations he takes readers on a journey through the history of our fractured continent, offering a revolutionary and revelatory take on American identity, and how the conflicts between them have shaped our past and continue to mold our future. From the Deep South to the Far West, to Yankeeedom to El Norte, Woodard (author of American Character: A History of the Epic Struggle Between Individual Liberty and the Common Good) reveals how each region continues to uphold its distinguishing ideals and identities today, with results that can be seen in the composition of the U.S. Congress or on the county-by-county election maps of any hotly contested election in our history.
