SC injection. Initial: 0.2-0.4 units/kg/day SC divided q8hr or more frequently. Maintenance: 0.5-1 unit/kg/day SC divided q8hr or more frequently; in insulin-resistant patients (eg, due to obesity), substantially higher daily insulin may be required. Approximately 50-75% of the total daily insulin requirements are given as intermediate- or long-acting insulin administered in 1-2 injections; rapid- or short-acting

*Humulin R, Novolin R (insulin regular human) dosing ...*

Sliding-scale regular insulin (SSI) in the management of patients with diabetes was the standard practice as early as 1934 (1) and was also used in the hyperglycemic emergency diabetic ketoacidosis (2). These earlier studies used urine glucose for sliding scale, but with demonstration of inaccuracy of urine glucose (3), blood glucose replaced urine glucose for sliding scale in diabetic ...

## Get Free Regular Insulin Sliding Scale Chart

When using long lasting insulin, rather than starting with a static dose every 12 hours as is typically prescribed, TR's approach is to use a three rung sliding scale. When compared to an intermediate action insulin, a tighter dosing scale is used with depot insulin types.

### *Insulin and Starting Scales, Diabetic Cat Care*

Insulin is usually injected in the fat under your skin using a syringe, insulin pen or insulin pump tubing. Which insulin is best for you depends on a number of factors. These factors include the type of diabetes you have, how much your blood sugar changes throughout the day and your lifestyle.
