*Application of GIS
and RS ...*

Remote sensing is the art and science of making measurements of the earth using sensors on airplanes or satellites. These sensors collect data in the form of images and provide specialized

Bookmark File

PDF Remote

capabilities for manipulating, analyzing, and visualizing those images. Remote sensed imagery is integrated within a GIS.

What are GIS and remote sensing?

During the flooding they act to reduce flood levels and to

Bookmark File

PDF Remote

trap suspended solids and attached nutrients. GIS provide options for wetland mapping and design projects for wetland conservation quickly with the help of GIS.

Integration with Remote Sensing data helps to complete wetland
