~~once you have the bolts all out gently pry on one corner of the valve cover to loosen it. now with just the right choice of words and patience, the valve cover can be lifted and slid downward and toward the front of the engine bay . once out remove old gasket and replace with new one .~~

~~changing a valve cover gasket on a 2006 3.7 Jeep KJ and -~~

~~Once the cover was off, removing the bolts with vise grips was fairly easy, as the real freeze was the corrosion between the cover and the bolt shanks and not the threads in the block. Though not ideal, it was far better(IMO) than needing to pull the engine to drill out the bolts. A new valve cover isn't too much money(\$45) and saved a ton of ...~~

~~('06-'08) - 2006 - Stripped Valve Cover Bolt Head...Need -~~

~~To take off the valve cover, you first need to remove the bolt using the screwdriver/socket. Then, tap around gently the valve cover with a torque wrench or a rubber mallet to make it loose. "Gently" is the keyword, if not, you may gouge the aluminum cylinder head, which results to permanent leaks.~~

~~Removing Valve Covers On 2006 Kia Sorento~~

~~The outback 06 2.5i valve cover on the passenger side has 7 bolts to remove - 1 is actually coming through the timing belt cover perpendicular to the other 6. Is this similar to your models? Yes mine had the extra bolt going through the timing belt cover too. However my valve covers have only 5 bolts going through to fasten to the head.~~

~~Valve cover gasket removal issues 06 outback | Subaru -~~

~~Replacing the gaskets requires removing the valve covers. To remove the valve covers you have to disconnect the wiring harness, pull the ignition coils, disconnect the cam position sensors, and disconnect the valve timing actuators. Once all these components are out of the way, you can remove the valve cover bolts and pop off the valve cover.~~

~~Ferrari F430 Valve Cover Gaskets | Normal Guy Supercar~~

~~Remove the cover over the ignition coils using a Torx T30 bit: Remove and set aside the ignition coils using a 10mm socket: Disconnect the crankcase ventilation hose from the valve cover using hose clamp pliers: Disconnect the cable duct using a 10mm socket and carefully guide it away from the edges of the valve cover:~~
