2003 Renault Kangoo MPG - Actual MPG from 5 2003 Renault ...
As you lot are a clever bunch, what do you make of Renault Kangoo's? I'm referring to the 1998-2008 variant. I'm assuming the 1.5 DCI is the same lump as in the wife's '03 Megane? I'm tempted by the MPG figures when compared with the original idea of a Combo C 1.7. Would the Kangoo cope with...

Innovative Methods in Logistics and Supply Chain Management

This edited volume presents the proceedings of the 20th CIRP LCE Conference, which cover various areas in life cycle engineering such as life cycle design, end-of-life management, manufacturing processes, manufacturing systems, methods and tools for sustainability, social sustainability, supply chain management, remanufacturing, etc.

This book focuses on the development of strategies for the successful internationalization of large and medium-sized companies. Becoming international offers important opportunities for companies of all sizes, but in an increasingly complex environment, the strategic planning involved is also a challenge. The book addresses this, putting forward suggestions that allow large and medium-sized companies to profit from internationalization. After a comprehensive introduction to internationalization and strategic planning, the authors make clear recommendations, suggesting detailed processes for developing international strategies. The book distinguishes between going global for new markets and internationalizing production and sourcing. For both, the book proposes procedures for performing meaningful strategic analyses and for developing successful international strategies. Lastly, it highlights the challenges faced by international companies and discusses useful decision processes. The book offers valuable insights for company executives, participants in Executive MBA programs, and master's students.

Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state-of-the-art, this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on the steady state and dynamic operation of electricity grids, identifies strategies to mitigate them and the possibility to support simultaneously large-scale integration of renewable energy sources. New business models and control management architectures, as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally, regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES-UETP umbrella in 2010 and 2011, this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

Adopting a multi-disciplinary approach and using the case of the automotive industry as a starting point this volume discusses how industrial companies can remain competitive in spite of the current economic downturn.

Wallace and his dog, Gromit, give readers a tour around their house while introducing some of Wallace's crazy inventions.

The book on Sustainable Automotive Technologies aims to draw special attention to the research and practice focused on new technologies and approaches capable of meeting the challenges to sustainable mobility. In particular, the book features incremental and radical technical advancements that are able to meet social, economic and environmental targets in both local and global contexts. These include original solutions to the problems of pollution and congestion, vehicle and public safety, sustainable vehicle design and manufacture, new structures and materials, new power-train technologies and vehicle concepts. In addition to vehicle technologies, the book is also concerned with the broader systemic issues such as sustainable supply chain systems, integrated logistics and telematics, and end-of-life vehicle management. It captures selected peer reviewed papers accepted for presentation at the 4th International Conference on Sustainable Automotive Technologies, ICSAT2012, held at the RMIT, Melbourne, Australia.
