Colts Patent Fire Arms Manufacturing Co - Graces Guide

Adams was the manager for the London arms manufacturers George & John Deane. On August 22, 1851, he was granted a British patent for a new revolver design. The .436 Deane and Adams was a five-shot percussion (cap-and-ball) revolver with a spurless hammer, and the first revolver with a solid frame. The revolver used a double-action only system in which the external hammer could not be cocked by thumbing it back, like most other pistols of the era, but instead cocked itself when the trigger ...

Revolver Firearms Being British Patent Number 1159 ...

Kerr later invented the Kerr's Patent Revolver, which was also produced by the London Armoury Company after Adams left the firm in 1859. By the mid-1850s, the British government had made significant purchases of Adams' revolvers : buying 19,400 Beaumont-Adams in 1855 and 1856 and a further 7,300 breech-loading Mk I, II & III Adams Revolvers between 1869 and 1880.

Robert Adams Designed a Revolver to Outshoot the Famous ...

The .450 brass cartridge replaced the separate cartridges and percussion caps of the earlier Adams Model of 1866. The Adams MkI had been Britain's first self contained centre-fire revolver, however it was the MkIII which was the most widely issued, seeing service all over the world. The MkIII was designed by John Adams of the London Armoury Company, Adams produced the British Army's side arms from the 1850s through to 1880 when Enfield took over, producing the Enfield MkI.

Kings Shilling Antiques - Pistols & Revolvers

This made it possible to fire the gun much more rapidly than contemporary single-action revolvers, such as the Colt, which had to be cocked before each shot. Deane and Adams' revolver was shown at the Great Exhibition of 1851, and subsequently approved by the British Army's Small Arms Committee in addition to being adopted by the East India Company for use by their cavalry.
