George Orwell's Nineteen Eighty-Four is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

The African slave trade, beginning in the fifteenth century, brought African languages into contact with Spanish and Portuguese, resulting in the Africans' gradual acquisition of these languages. In this 2004 book, John Lipski describes the major forms of Afro-Hispanic language found in the Iberian Peninsula and Latin America over the last 500 years. As well as discussing pronunciation, morphology and syntax, he separates legitimate forms of Afro-Hispanic expression from those that result from racist stereotyping, to assess how contact with the African diaspora has had a permanent impact on contemporary Spanish. A principal issue is the possibility that Spanish, in contact with speakers of African languages, may have creolized and restructured - in the Caribbean and perhaps elsewhere - permanently affecting regional and social varieties of Spanish today. The book is accompanied by the largest known anthology of primary Afro-Hispanic texts from Iberia, Latin America, and former Afro-Hispanic contacts in Africa and Asia.

This handbook, the first of its kind, includes descriptions of the ancient and modern Jewish languages other than Hebrew, including historical and linguistic overviews, numerous text samples, and comprehensive bibliographies.

The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of

individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.
