It sets out a very practical approach to how the risk management process can deliver value through effective facilitation. It brings together Ruth Murray-Webster's expertise in the human aspects of risk and risk attitude and Penny Pullan's wide experience of the facilitation of project workshops to cover five main areas: avoiding pitfalls - how to makesure you are better prepared, better able to use your knowledge with groups and better able to avoid unsupported or skewed results; an understanding of risk management - to refresh your own knowledge and provide the basis for knowledge and ideas you can share with your group(s); understanding your role - whether you are a full-time facilitator or a line manager with the need to improve risk management, you'll learn the skills you need and gain an understanding of how best to develop them; tried and tested tips for each step of the risk management process - proven practices showing how you can use the right mix of workshops, small groups and individual work to keep people engaged and get results; running risk workshops - the whole area of making workshops work. This book is illustrated with practical examples from the authors' experience and their findings from interviews and surveys to help you get the best from your groups when they're working together, both face-to-face and virtually.
