This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise, but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

This book is published by invincible publishers and we are proud to inform you that this is an Indian title. The author of the book is also Indian.

This book constitutes the refereed post-conference proceedings of the 11th IFIP TC 3 World Conference on Computers in Education, WCCE 2017, held in Dublin, Ireland, in July 2017. The 57 revised full papers and 10 short papers were carefully reviewed and selected from 116 submissions during two rounds of reviewing and improvement. The papers are organized in the following topical sections: futures of technology for learning and education; innovative practices with learning technologies; and computer science education and its future focus and development. Also included is "The Dublin Declaration" which identifies key aspects of innovation, development successes, concerns and interests in relation to ICT and education.

What is "digital rhetoric"? This book aims to answer that question by looking at a number of interrelated histories, as well as evaluating a wide range of methods and practices from fields in the humanities, social sciences, and information sciences to determine what might constitute the work and the world of digital rhetoric. The advent of digital and networked communication technologies prompts renewed interest in basic questions such as What counts as a text? and Can traditional rhetoric operate in digital spheres or will it need to be revised? Or will we need to invent new rhetorical practices altogether? Through examples and consideration of digital rhetoric theories, methods for both researching and making in digital rhetoric fields, and examples of digital rhetoric pedagogy, scholarship, and public performance, this book delivers a broad overview of digital rhetoric. In addition, Douglas Eyman provides historical context by investigating the histories and boundaries that arise from mapping this emerging field and by focusing on the theories that have been taken up and revised by digital rhetoric scholars and practitioners. Both traditional and new methods are examined for the tools they provide that can be used to both study digital rhetoric and to potentially make new forms that draw on digital rhetoric for their persuasive power.

Parenting: An Ecological Perspective was originally created in 1993 to answer questions such as: Why do parents differ markedly in the ways in which they care for their children? What factors contribute to individual differences in parenting behavior? The framework used for addressing these questions is the ecological perspective developed by Urie Bronfenbrenner, who recognized that children's development is influenced by the interactions that they have over time with the people, objects, and symbols in their immediate environment. Luster and Okagaki have updated the original text focusing on parental behavior and also included 6 new chapters covering topics such as: *fathers/gender of parent; *children with special needs; *ethnicity and socioeconomic status; and *parent education. The text summarizes the latest research on factors that influence parenting, with each chapter providing a look at one important influence and the linkages among these various factors. An ecological perspective draws attention to the fact that the lives of parents and children are intertwined, and that understanding factors that influence parents is important for understanding the experiences of children.

Identifies the major designers and retailers who have impacted 19th- and 20th-century American fashion and culture.
