To improve efficiency and productivity Dealer Business Management (DBM) integrates the possibility of multiple vehicle processing. This function allows you to process multiple vehicles (of the same or different models) at once. In make to order scenarios, for example, you can use the Mass Vehicle Processing transaction to procure vehicles from an OEM in a lot, rather than one at a time.

Indeed very nice blog on SAP DBM 7- spare parts sales side. My question is related to Inventory management , this also comes in to picture during the cash or service sales of the parts for car. I wanted to ask you the scenario in most of the automobile dealership they have many parts in one warehouse which we can map at storage location level. material mapped with regular material master of MM.
