SCAA Standard | Water for Brewing Specialty Coffee (SCAA Water Standards) The research conducted by Mr. Hendon and Mr. Colonna-Dashwood is accurate stating that different ions in the water will effect extraction differently. SCAA water quality standards do not specifically address individual dissolved solids, only the total dissolved solids.

Water Quality for Coffee Beverages | Coffee Enterprises

The simple answer is: for most home coffee brewing is 2 Tbsp. (10.6 g) of ground coffee beans per 6 oz. of water. A standard coffee measure should be 2 Tbsp. (2 Tbsp. = 1/8 cup = 10.6 g). The SCAA defines 10 grams or 0.36 oz. per 6-oz cup as the proper measure for brewed coffee using the American standards.
