Selenium resembles sulfur (S) chemically and shares a similar pathway for uptake and translocation in plants. For example, SeO_3^{2-} and SeO_4^{2-} are analogs of SO_3^{2-} and SO_4^{2-} , respectively. Therefore, they can compete with each other in acidic conditions (Golob et al., 2016; González-Morales et al., 2017). Among the Se species, SeO_4^{2-} uses SO_4^{2-} transporters of the root ...

is held to apply even to the smallest unit of life - cells. However, there is a phenomenon that is sometimes called biological immortality. It refers to cells that live beyond their proclaimed life span, which is roughly set by the Hayflick limit. All cancer cells have acquired this property; they divide indefinitely, which is the essential problem with cancer cells. On the other hand, researchers are very much interested in the molecular mechanism behind this property to may be able to use it to extend life and rejuvenate cells. Cells that are not subject to the Hayflick limit are generally seen as a threat to the human body, however, they are interesting subjects of experiments and scientists have already learned a great deal of knowledge by studying these mutants and continue to gain more important insights into the functioning of any kind of human body cell. Immortal cells can be boon and bane

"In *Menopause: A Midlife Passage*, [questions about menopause] are considered in depth from a dazzling variety of angles. This is just the serious feminist discussion of menopause that I have been longing for.... its exquisite analyses renew us in our struggles to make sense of it all." -- Alice Dan, *Women's Review of Books* "Menopause has become a hot (with or without the flashes) topic in America. That's because a critical mass of us have reached it and are educated, aggressive, and confident enough to want to know what's happening to us, and then to talk about it.... Smart, useful, funny, *Menopause: A Midlife Passage* is a fine addition to the discussion, a healthy companion for this all-important life passage." -- Susan Stamberg, *Special Correspondent, National Public Radio* "Editor Callahan takes anything but a trendy approach to a very trendy topic.

She's gathered essays by scholarly women who have thought through society's position on menopause and menopausal women and don't like what they see: older women denied positive portrayals in mainstream media, menopause treated by the medical establishment as if it were a disease rather than a natural occurrence, and devaluation of older women.

Determined to change people's minds with their words, these women speak both powerfully and empoweringly. A must for feminist and women's health collections." -- Booklist "... a bold attempt to go beyond the standard medical framing of women's experience, and to contest the notion that the menopause is straightforwardly a hormonal 'deficiency disease'." -- New Scientist "...
