This Section provides requirements for all methods of construction of power, electric, and miniature boilers; high temperature water boilers, heat recovery steam generators, and certain fired pressure vessels to be used in stationary service; and power boilers used in locomotive, portable, and traction service. Rules pertaining to use of the ASME Certification Mark and V, A, M, PP, S and E ...

**BPVC Section I-Rules for Construction of Power Boilers - ASME**

This guide is intended as a supplement for ASME stamp holders using ASME Boiler and Pressure Vessel Code (BPVC) Section I as the basis for conformity with the European Commission (EC) Pressure Equipment Directive (PED), 97/23/EC.

**ASME Section I Power Boilers - PED Guide: Supplement to ...**

ASME Section I has total administrative jurisdiction and technical responsibility for boiler proper; refer to Fig. A4.1.

**ASME Section I Power Boilers - Little P.Eng.**

Sections are ASME local chapters led by volunteers. Each ASME member is automatically assigned to a local section based on their geographic location. Find your local section in the Volunteer Leadership Directory (VLD) by selecting " Section " as the Group Category before entering your search terms. How to Get Involved

**Professional Sections - ASME**

Section I, Revision of Code Case 1876 -4 to extend the maximum permitted design temperature from the present 1100F (593C) maximum to 1200F (649C) for Grade 91 (9Cr - 1Mo-V) wrought material. 13-120 BPV I Incorporation of Code Case 2328-1 in Section I.

**ASME and NBIC 2015 Edition Changes**

A section 1 valve is certified for a fired pressure vessel. The pop and blowdown are 3% of set pressure. There are TWO rings to adjust to control the pop and the blowdown, and a section 1 valve usually has an exposed spring to keep it cool. A lifting lever is mandatory.
