Self-Consistency Theory was developed by Prescott Lecky in the 1920s and focuses on the importance of the self in the regulation of thoughts and ideas. The basis of this theory proposes that people use self-helping measures to maintain constancy (or consistency) of ideas within an individual. Consistency of ideas and representation of the self are integral in humans.

Self-Consistency A Theory Of Personality...

A consistency proof is a mathematical proof that a particular theory is consistent. The early development of mathematical proof theory was driven by the desire to provide finitary consistency proofs for all of mathematics as part of Hilbert's program. Hilbert's program was strongly impacted by the incompleteness theorems, which showed that sufficiently strong proof theories cannot prove their own consistency. Although consistency can be proved by means of model theory, it is often done in a pure

Consistency - Wikipedia

Abstract. We propose a theory for rating financial securities based on a concept of self-consistency, which does not allow issuers to gain, by tranching financial securities, from investors who rely on the rating criterion. While the expected loss criterion used by Moody's satisfies self-consistency, the probability of default criterion used by S&P does not.

Self Consistency A Theory Of Personality

The Novikov self-consistency principle, also known as the Novikov self-consistency conjecture and Larry Niven's law of conservation of history, is a principle developed by Russian physicist Igor Dmitriyevich Novikov in the mid-1980s. Novikov intended it to solve the problem of paradoxes in time travel, which is theoretically permitted in certain solutions of general relativity that contain what are known as closed timelike curves. The principle asserts that if an event exists that would cause a

Novikov self-consistency principle - Wikipedia

Consistency is described as the "compatibility of many simultaneously transpiring mental processes" (Grawe, 2007, p.170), and is a systemic demand, on a neural level, for harmonious neural flow. When the relationship between intrapsychic processes and states are harmonious, there is a state of consistency.

This study, based on constructs from Roy's adaptation model, examined the relationship between cognitive adaptation processes and self-consistency in hearing-impaired elders (N = 130). Data were collected through survey questionnaires. Major research hypotheses were formulated and tested. Results of this study supported Roy's theoretical proposition of cognitive adaptation processes and ...
