Features. Conceptual and
Methodological Issues
relates the research areas
of housing preferences and
the meaning of a dwelling
with each other and with

aspects of the means-end approach as applied in marketing research. It results in a conceptual and methodological framework for studying the meaning of preferences for dwelling features. These features are

File Type PDF Sheet Music Agnus Dei

viewed as functional for achieving the goals and values that people pursue. The meaning of dwelling features lies in these functional relationships. The model presented in this study therefore relates

preferences for the features of a dwelling to the meaning they have for people. These relationships are called meaning structures. Meaning structures are measured by a semi-structured interviewing technique, which is an

Written between 1887 and 1890, Gabriel Faure's
