the health, safety and welfare of others by effective design and management. The authors describe the most common hazards of construction work and how to reduce the consequent risks. They explain the essential details of construction safety law, the organisational basis for implementing health and safety policies, and duties under current safety regulations. This edition has been fully revised to incorporate developments in construction methods and new legislative requirements.

The construction industry is working hard to improve its health and safety record. It is now essential for employers and employees to be aware of the health

and safety issues that concern them and demand for qualifications in this area is increasing. The coverage of this book has been directly matched to the Certificate course in Construction Safety and Health from NEBOSH. However, the comprehensive coverage of health and safety topics in a construction context make it relevant for other courses in Construction Design and Management, Construction Safety and Health, and the Built Environment, both in the UK and overseas. The text is highly illustrated in full colour, easy to read and includes self-assessment questions taken directly from NEBOSH examinations as well as a study skills chapter. The text is also supported with checklists, report forms and record sheets, making it

Logistics is a complex industry that exposes employees to a whole variety of risks. These include not only accidents on the road and deaths and injuries resulting from unsafe use of forklifts, but also the consequences of poor fire safety, long-term health risks due to poor manual handling technique and problems relating to mental health. Many thousands of incidents are recorded every year. This book examines each aspect of health and safety in turn, with a focus on warehousing and transportation. Health and Safety in Logistics informs managers about potential hazards found in the industry and explains in detail how they can make the workplace as safe as possible.
