The Oracle Solaris 11.4 Observability Tools are comprised features integrated into Oracle Solaris 11 that allow you to troubleshoot system and application problems in real time giving you real-time and historical insight allowing for unprecedented power to diagnose and resolve issues quickly and easily. DTrace is our builtin programmatic observability and diagnosis capability.

"The Solaris (TM) Internals volumes are simply the best and most comprehensive treatment of the Solaris (and OpenSolaris) Operating Environment. Any person using Solaris--in any capacity--would be remiss not to include these two new volumes in their personal library. With advanced observability tools in Solaris (like DTrace), you will more often find yourself in what was pre
