Install R and RStudio. R and RStudio are two separate pieces of software: R is a programming language that is especially powerful for data exploration, visualization, and statistical analysis; RStudio is an integrated development environment (IDE) that makes using R easier. In this course we use RStudio to interact with R. If you don't already have R and RStudio installed, follow the ...

Statistics for Ecologists. Online exercises and examples

All journals examined showed a consistent increase in the percentage of articles using R from 2008 to 2017 (Appendices S2, S3). The average percentage among all journals (Appendix S4) show Methods in Ecology and Evolution had the highest mean percent of reported R use (53%). This suggests that the majority of contemporary methods in ecology and evolution are supported by or done using the programming

researchers can use one consistent environment for many tasks. It is because of the price of R, extensibility, and the growing use of R in bioinformatics that R was chosen as the software for this book. The “disadvantage” of R is that there is a learning curve required to master its use (however, this is the case with all statistical software).

Statistics Using R with Biological Examples

Statistics for Ecologists Using R and Excel "Citizen Science" is a recently coined term that is everywhere now, but which describes an activity BTO volunteers have been doing for decades - going out and collecting data on birds, whether that be counting (BBS, GBW, WeBS), ringing or recording nests.
