Stereoelectronic Effects (Oxford Chemistry Primers) Every serious student of chemistry should try to develop a 'feel' for the way molecules behave - for the way they are put together and especially for the rules of engagement which operate when molecules meet and react. This primer describes how stereoelectronic effects control this behavior.

stereoelectronic effects oxford chemistry primers

Stereoelectrochemistry being an important factor in organic molecules, it means that the electronic delocalization must be taken into account in three-dimension. This leads to what is called «stereoelectronic effects». In other words, electron delocalization can take place only when there is proper alignment of orbital.

STEREOELECTRONIC EFFECTS (S.E.) IN ORGANIC CHEMISTRY
