This book absolutely does not prepare you for the physics GRE. The practice problems do not match up to the actual test at all and I fully believe it made me do worse on the physics GRE then if I hadn't used it. If you buy this you are A.) setting yourself up for failure and B.) wasting your money.

The practice questions are ridiculously easier than and GRE test and will not help you whatsoever when writing the test. I feel scammed just for buying this. Also, check out the history of other reviewers of this book (i.e. the multiple 5 star reviews from amazon.com), these reviews are definitely sketchy, like you would expect if Sterling Test Prep wrote them themselves.

This book was developed through an analysis of prior MBE exams to identify questions that are best able to predict success or failure on the bar examination. The outlines describe principles of substantive law, which most often govern the correct answer to most questions on each section of the MBE: ? Constitutional law ? Contract law ? Criminal law ? Evidence ? Property law ? Tort law ? Federal jurisdiction MBE Essentials: Governing Law describes the principles of substantive law, which most often governs the correct answers to Multistate Bar Examination Questions. The performance of candidates on individual questions has been correlated with success or failure on the bar examination. Through an analysis of these statistics, we have been able to identify those questions that are best able to predict success or failure on the bar examination and put together the outlines of laws that govern those questions. Students should learn these important governing law principles in order to determine the answers to the questions on the MBE. These rules of law will likely determine the answers to more than half of the questions on each section of the MBE. Knowing these principles helps to make a decision between two tough choices; it is important to have this knowledge to get a passing score on the exam.
