Pulitzer Prize-winning journalist Walter Pincus exposes the darkest secret in American nuclear history—sixty-seven nuclear tests in the Marshall Islands that decimated a people and their land. The most important place in American nuclear history are the Marshall Islands—an idyllic Pacific paradise that served as the staging ground for over sixty US nuclear tests. It was here, from 1946 to 1958, that America perfected the weapon that preserved the peace of the post-war years. It was here—with the 1954 Castle Bravo test over Bikini Atoll—that America executed its largest nuclear detonation, a thousand times more powerful than Hiroshima. And it was here that a native people became unwilling test subjects in the first large scale study of nuclear radiation fallout when the ashes rained down on powerless villagers, contaminating the land they loved and forever changing a way of life. In Blown to Hell, Pulitzer Prize-winning journalist Walter Pincus tells for the first time the tragic story of the Marshallese people caught in the crosshairs of American nuclear testing. From John Anjain, a local magistrate of Rongelap Atoll who loses more than most; to the radiation-exposed crew of the Japanese fishing boat the Lucky Dragon; to Dr. Robert Conard, a Navy physician who realized the dangers facing the islanders and attempted to help them; to the Washington power brokers trying to keep the unthinkable fallout from public view . . . Blown to Hell tells the human story of America’s nuclear testing program. Displaced from the only homes they had known, the native tribes that inhabited the serene Pacific atolls for millennia before they became ground zero for America’s first thermonuclear detonations returned to homes despoiled by radiation—if they were lucky enough to return at all. Others were ripped from their ancestral lands and shuttled to new islands with little regard for how the new environment supported their way of life and little acknowledgement of all they left behind. But not even the disruptive relocations allowed the islanders to escape the fallout.

**** COMPELLING - The Sunday Telegraph CONTROVERSIAL ... Sounes' book pushes the standard Reed narrative - The New York Times Lou Reed, who died in 2013, was best known to the general public as the grumpy New Yorker in black who sang 'Walk on the Wild Side'. To his dedicated admirers, however, he was one of the most innovative and intelligent American songwriters of modern times, a natural outsider who lived a tumultuous and tortured life. In this in-depth, meticulously researched and very entertaining biography, respected biographer Howard Sounes examines the life and work of this fascinating man, from birth to death, including his time as the leader of The Velvet Underground - one of the most important bands in rock'n'roll. Written with a deep knowledge and understanding of the music, Sounes also sheds entirely new light on the artist's creative process, his mental health problems, his bisexuality, his three marriages, and his addictions to drugs and alcohol. In the course of his research, Sounes has interviewed over 140 people from every part of Lou Reed's life - some of whom have not spoken publicly about him before - including music industry figures, band members, fellow celebrities, family members, former wives and lovers. This book brings Lou Reed and his world alive.

From a journalist on the frontlines of the Students for Fair Admission (SFFA) v. Harvard case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast to coast have quietly assumed mastery of the nation's technical and intellectual machinery and become essential American workers. Yet, they've been forced to do so in the face of policy proposals?written in the name of diversity?excluding them from the upper ranks of the elite. In An Inconvenient Minority, journalist Kenny Xu traces elite America's longstanding unease about a minority potentially upending them. Leftist agendas, such as eliminating standardized testing, doling out racial advantages to "preferred" minorities, and lumping Asians into "privileged" categories despite their deprived historical experiences have spurred Asian Americans to act. Going beyond the Students for Fair Admission (SFFA) v. Harvard case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio's attempted makeover of New York City's Specialized School programs to the battle over "diversity" quotas in Google's and Facebook's progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans' time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. An Inconvenient Minority chronicles the political and economic repression and renaissance of a long ignored racial identity group?and how they are central to reversing America's cultural decline and preserving the dynamism of the free world.

The "engrossing, thoroughly researched look at women who are in romantic relationships with incarcerated men"—fully updated with twenty-first-century cases (Publishers Weekly). In 1991, Sheila Isenberg's classic study Women Who Love Men Who Kill asked the provocative question, "Why do women fall in love with convicted murderers?" Now, Isenberg returns to the same question in the age of smart phones, social media, mass shootings, and modern prison dating. The result is a compelling psychological study of prison passion in the new millennium. Isenberg conducts extensive interviews with women who seek relationships with convicted killers, as well as conversations with psychiatrists, social workers, and prison officials. She shows that many of these women know exactly what they are getting into—yet they are willing to sacrifice everything for the sake of a love without hope, promise, or consummation. This edition of Women Who Love Men Who Kill includes gripping new case studies and an absorbing look at how the digital age is revolutionizing this phenomenon. Meet the young women writing "fan fiction" featuring America's most sadistic murderers; the killer serving consecutive life sentences for strangling his wife and smothering his toddler daughters—and the women who visit him in prison; the high-powered journalist who fell in love and risked it all for "Pharma Bro" Martin Shkreli; and many other women absorbed in online and real-life dalliances with their killer men.

Legendary football coach and Super Bowl champion with the Denver Broncos, Wade Phillips, recalls his life in football and memories of his father, NFL head coach Bum Phillips, in a book perfect for a Father's Day gift. "Having played for and against Wade Phillips, the first word that comes to my mind is respect. SON OF BUM is a great read about the Xs and Os from one of the greatest coaches in the league, as well as a loving tribute to the influence of family."—Peyton Manning In his memoir Son of Bum, decorated NFL coach Wade Phillips shows that the roots of his knowledge come from his father, Bum Phillips. A beloved character in NFL history, Bum taught Wade from the beginning that "coaching isn't bitching," as well as how to have perspective on the game during tough times. These are lessons that apply both on the field and off, and Wade has passed this wisdom down to his son, Wes Phillips, an NFL coach himself. Known for his homespun, plain-talking ways, Wade is a groundbreaking coach who has long believed in using support and camaraderie—instead of punishment and anger—to inspire his players to be winners on and off the field. And though his defensive concepts are revolutionary, he would say they begin with common sense. Son of Bum is more than one man's memoir—it's a story of family and football and a father who inspired his son.

In the not-too-distant future, in what was once the old City of New York, megacorporations have taken over everything. Now even the internet is owned, and the only way to transmit sensitive information is by a network of highly skilled couriers called "data runners" who run it over the sneakernet. It is a dangerous gig in a dirty world, but Jack Nill doesn't have much choice in the matter. A brilliant young math whiz and champion of parkour, Jack must become one of these data runners in order to get his father out of a major gambling debt. When a mysterious stranger loads Jack's chip with a cryptic cargo that everybody wants, he soon becomes the key figure in a conspiracy that could affect the entire North American Alliance. Now it's all up to Jack. With the help of his best friend, Dexter, and a girl who runs under the name Red Tail, Jack will have to use all his skills to outrun the retrievers and uncover the truth before they catch him and clip him for good.

Business Analytics, Second Edition teaches the fundamental concepts of the emerging field of business analytics and provides vital tools in understanding how data analysis works in today's organizations. Students will learn to apply basic business analytics principles, communicate with analytics professionals, and effectively use and interpret analytic models to make better business decisions. Included access to commercial grade analytics software gives students real-world experience and career-focused value. Author James Evans takes a balanced, holistic approach and looks at business analytics from descriptive, and predictive perspectives.

This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the entire twentieth century. This extensively revised edition follows the successful format of previous editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as

well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.
