The new paradigm for investing and building wealth in the twenty-first century. The Future for Investors reveals new strategies that take advantage of the dramatic changes and opportunities that will appear in world markets. Jeremy Siegel, one of the world's top investing experts, has taken a long, hard, and in-depth look at the market and the stocks that investors should acquire to build long-term wealth. His surprising finding is that the new technologies, expanding industries, and fast-growing countries that

Stockholders relentlessly seek in the market often lead to poor returns. In fact, growth itself can be an investment trap, luring investors into overpriced stocks and overly competitive industries. The Future for Investors shatters conventional wisdom and provides a framework for picking stocks that will be long-term winners. While technological innovation spurs economic growth, it has not been kind to investors. Instead, companies that have marketed tried-and-true products for decades in slow-growth or even declining industries have superior returns to firms that develop "the bold and the new." Industry sectors many regard as dinosaurs—railroads and oil companies, for example—have actually beat the market. Professor Siegel presents these strategies within the context of the coming shift in global economic power and the demographic age wave that will sweep the United States, Europe, and Japan. Contrary to the popular belief that these economic and demographic trends doom investors to poor returns, Professor Siegel explains the True New Economy and how to take advantage of the coming surge in invention, discovery, and economic growth. The faster the world changes, the more important it is for investors to heed the lessons of the past and find the tried-and-true companies that can help you beat the market and prosper in the years ahead.

"Siegel's conclusion - that, when long-term purchasing power is considered, stocks are actually safer than bank deposits! - is now strengthened with updated research findings and information that include a thorough analysis of the "Dow 10" and other yield-based strategies that have captivated investors over the past several years; how the Baby Boom generation will change the stock market forever - knowledge that can energize your own portfolio's performance; the amazing effect of the calendar on stock market performance - and how investing at certain times of the year can enhance performance; how the newest tax laws impact your investment returns and the funding of your retirement account; analyses and performance comparisons of highly publicized market sectors such as small cap stocks, growth stocks, and the "Nifty Fifty" stocks; and how Wall Street pros use investor sentiment and Fed policy to successfully time stock purchases over the investment cycle."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
