Discovery Learning (Bruner) – Learning Theories

A Brief Summary of Discovery Learning Discovery Learning is a method of inquiry-based instruction and is considered a constructivist based approach to education. It is supported by the work of learning theorists and psychologists Jean Piaget, Jerome Bruner, and Seymour Papert. Jerome Bruner is thought to have originated discovery learning in the 1960s, but his ideas are

A Brief Summary of Discovery Learning

Discovery Learning (Jerome Bruner – 1961) To the foundation of constructive learning theory established by Piaget, Jerome Bruner contributed important ideas regarding (a) modes of representation, (b) the importance of teaching and learning “ optimal structure ” (J. S. Bruner, 1966b, p. 41), (c) the spiral curriculum, and (d) learning through acts of discovery in order to rearrange and transform what is learned “ in such a way that one is enabled to go beyond the evidence so reassembled ...

Student Resources - Books of Discovery

According to Bruner, discovery learning helps students become more independent problem solvers because they relate ideas to each other and to their existing knowledge. One assumption of constructivism is that meaningful learning is the result of individuals using their knowledge and experience to create a personal view of the world.
