This book teaches medical coding for anesthesia and pain management. It will prepare the reader for passing the Certified Anesthesia and Pain Management Coder (CANPC) exam as well as improving their professional practice. The book goes beyond the concepts and applications that are required to pass the exam. It provides critical insights into actual scenarios faced by coders in the real world. 70 unique cases are presented that will highlight the correct coding method. These give the reader practice in applying principles to actual patient cases. The author's unique formula allows the reader to arrive at the best coding decision for the most complex patients. Each case is discussed from a clinical viewpoint to explain the coding rationale. This book is both an invaluable asset for anyone working towards a CANPC exam but also serves as a useful reference for those currently holding the certificate.

As governments seek to mitigate the cost of state-subsidised healthcare, branding in the pharmaceutical industry has become a critical issue. Drugs companies must change their methods of communication and distribution - focusing more on their direct relationship with the consumer. This requires fundamental changes in consumer behaviour, access to information, freedom of choice and value for money. Brands and brand values will play a leading role in this process, as has been seen with products such as Prozac and Viagra. This book by Interbrand Newell and Sorrell, the world's leading branding consultancy, provides cutting edge thinking on this area and lessons for anyone involved in brand development and management.

The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

From Academia to Entrepreneur: Lessons from the Real World provides practical advice on entrepreneurship, interspersed with insights the author gained from starting up his own business and in associations with other ventures. These same insights can be applied to bringing a technology concept from academia to an enterprise. A few of the questions From Academia to Entrepreneur: Lessons from the Real World answers: How do I pragmatically appraise business opportunities? What traits should I look for in an enterprise? What can and should I do with my concept while in academia, before entering such an endeavor? How do I overcome risk aversion? And most importantly, why should I be the one to build this business? Provides insights into using academic research as a potential business, meeting the challenges and opportunities in today's academic research environment Offers practical ideas on entrepreneurship Describes how to take a company to financial profit and maintain it Emphasizes the pragmatic details to work through, equipping you with the correct set of tools to build your business
