4.1.4 Dual Boot (opensUSE and MS Windows on the same computer) Having opensUSE and MS Windows installed on the same computer is usually fairly simple if MS Windows was installed first. During installation opensUSE will detect MS Windows and the bootloader will display a menu on each startup letting you choose whether to boot opensUSE or MS Windows. opensUSE needs to be installed on a separate partition/disk.

If you want OpenSuse to control booting, have it install to MBR of drive (eg. /dev/sda). If you want LL to remain in control, have OpenSuse's grub installed to it's root partition (eg. /dev/sda2), or not at all if that's an option. If you choose the latter you'll need to update grub in LL before the choice to boot OpenSuse appears on the grub menu.
