Modern silos are ventilated with conditioned air

of 20–30°C and

have a low

relative

humidity. In the

case of

continuous

ventilation and

avoided

condensation,

the sugar is in

Online Library

Sugar Storage

equilibrium with a water content of up to 0.05%, so that no caking occurs. Figure 8 shows how the relative humidity affects the product quality.

~~The right approach how to~~

Online Library Sugar Storage design the Slow conditioning system . . .

Sugar storage silos are part of the production facility, typical in the beverage industry. As sugar dust poses a serious risk of explosion,

Online Library

Sugar Storage

the silos and their associated transport systems must be effectively protected against the effects of an explosion.
