This complete self-study course on coding combines content, practice, and self-assessment into one online learning tool that the learner can follow at his or her own pace. The online program assumes the

Bookmark File PDF Superbill Template Pulmonologist

role of instructor, guiding individuals through the material and directing them when to read relevant sections from the text, checking their comprehension along the way, and providing feedback and encouragement. Users follow the program and learn at their own pace, working through chapter "lesson lectures" and reading assigned sections of the text as they progress. Interactive exercises, questions, and activities allow users to check their comprehension and learn from immediate feedback. Illustrations clarify concepts and familiarize students with the clinical procedures they are learning to code. Chapter exams are scored and incorporated in a grade book, which users can view to evaluate their progress. A series of approximately 18 SlideShows with audio narration explain and demonstrate clinical procedures. Hypertext links incorporated into the lesson lectures open pop-up boxes with further explanations and/or definitions of concepts and terms. Links to relevant web sites provide additional resources to enhance learning or stimulate discussion within a cohort group. An extensive glossary of approximately 650 terms provides correct definition for key terms throughout the course. All content has been updated to current industry standards; for use with Step-by-Step Medical Coding, 5th Edition ensuring that students learn from the most up-to-date material available. Each online chapter includes engaging "lesson lectures" by the author, guiding the learner through the online and text content. Interspersed self-comprehension questions, learning activities, and lesson quizzes throughout the online content allow learners to check their comprehension and learn from feedback. End-of-chapter review and self-assessment exercises include a specially created case-based coding activity, as well as matching, fill-in-the-blank, and multiple choice. Answers to the textbook exercises allow students to check their work on the exercises printed in the text against the answers posted within the course.

Healthcare Information Management Systems, 4th edition, is a comprehensive volume addressing the technical, organizational and management issues confronted by healthcare professionals in the selection, implementation and management of healthcare information systems. With contributions from experts in the field, this book focuses on topics such as strategic planning, turning a plan into reality, implementation, patient-centered technologies, privacy, the new culture of patient safety and the future of technologies in progress. With the addition of many new chapters, the 4th Edition is also richly peppered with case studies of implementation. The case studies are evidence that information technology can be implemented efficiently to yield results, yet they do not overlook pitfalls, hurdles, and other challenges that are encountered. Designed for use by physicians, nurses, nursing and medical directors, department heads, CEOs, CFOs, CIOs, COOs, and healthcare informaticians, the book aims to be a indispensable reference.

For the pediatric provider, coder, and biller, here's the most helpful and easy-to-use manual on

ICD-10-CM yet. Completely updated for 2022, this edition includes new codes on the following: Acute flaccid myelitis, Cough (expanded), Pediatric Feeding Disorder, gene therapy and many more.

This year's completely updated 27th edition of Coding for Pediatrics includes all changes in Current Procedural Terminology (CPT®) codes--complete with expert guidance for their application. Also included are the new office and outpatient evaluation and management coding changes. The book's many clinical vignettes and examples, as well as the many coding pearls throughout, provide added guidance needed to ensure accuracy and payment. KEY UPDATES * New chapters dedicated to telemedicine and remote physiological data services * New codes for single-disease care management * New codes for congenital cardiac catheterization * Clarifications to outpatient E/M requirements * Coding changes in the following areas: - Updates to musculoskeletal system - Cardiovascular - Male genital system - Face to face medicine - COVID vaccines * More than 80 new and revised coding examples * Revised organization for more efficient and easier content access * Additional online-only content added

Now in its Second Edition, this text focuses exclusively on the management of hospitalized pediatric patients from admission to discharge. It is an excellent resource for residency programs, hospitalist fellowships, and continuing education for physicians whose practice includes the management of hospitalized newborns and children. Because pediatric hospital care is provided by a wide variety of healthcare professionals and in many different hospital settings, this text provides a framework for unified management and effective and efficient care. This edition includes new sections on emergency medicine and psychiatric hospitalization and expanded coverage of management of children with complex and chronic conditions.

Section 1557 is the nondiscrimination provision of the Affordable Care Act (ACA). This brief guide explains Section 1557 in more detail and what your practice needs to do to meet the requirements of this federal law. Includes sample notices of nondiscrimination, as well as taglines translated for the top 15 languages by state.

Life Care Planning and Case Management Handbook, Second Edition brings together the many concepts, beliefs, and procedures regarding life care plans into one state-of-the-art publication. This second edition of a bestseller is focused on prioritizing and managing the spectrum of services for people with serious medical problems and their families. Keeping up with advances in the field, this is the most
