Bilingual mind/6 children in executive-control tasks that require inhibition of attention to conflicting response options but not in tasks requiring inhibition of a habitual response to a familiar stimulus.

Cognitive and Linguistic Processing in the Bilingual Mind

Cognitive Complexity and Attentional Control in the Bilingual Mind Ellen Bialystok In the analysis and control framework, Bialystok identifies analysis (representation) and control (selective attention) as components of language processing and has shown that one of these, control, develops earlier in bilingual children than in comparable monolinguals. In the theory of cognitive complexity ...

Cognitive Complexity and Attentional Control in the ...

Pavlenko considers the socio-political circumstances that led to the monolingual status quo and shows how the invisibility of bilingual participants compromised the validity and reliability of findings in the study of language and cognition. She then shifts attention to the bilingual turn in the field and examines its contributions to the understanding of the human mind.
