Ethical Eaters is a movement and awareness campaign dedicated to spreading information and awareness about how to promote animal wellbeing. Our GOAL We believe that the 'all-or-nothing' approach of many animal rights advocates and environmental activists has led to many people giving up entirely on adjusting their behavior to limit animal suffering.

Plants with special needs: Caring for potted carnivores These gardeners like a challenge. If it's a plant that feeds on insects, grows in water or grows on other plants, you can count them in.

Winner of two 2017 Guild of Food Writers Awards: best Food Book Award and the Campaigning and Investigative Food Work Award Shortlisted for the 2017 Fortnum & Mason Food Book of the Year A BBC Radio 4 Food Programme Book of the Year 2016 A Guardian Book of the Year 2016 We should all know exactly where our meat comes from. But what if you took this modern-day maxim to its logical conclusion and only ate animals you killed yourself? Louise Gray decides to be an ethical carnivore and learn to stalk, shoot and fish. Starting small, Louise shucks oysters and catches a trout. As she begins to reconnect with nature, she befriends countrymen and women who can teach her to shoot pigeons, rabbits and red deer. Louise begins to look into how meat is processed, including the beef in our burgers, cheap chicken, supermarket bacon and farmed fish. She investigates halal slaughter and visits abattoirs to ask whether new technology can make eating meat more humane. Delving into alternative food cultures, Louise finds herself sourcing roadkill and cooking a squirrel stir-fry, and she explores eating other sources of protein like in vitro meat, insects and plant-based options. With the global demand for meat growing, Louise argues that eating less meat should be an essential part of fighting climate change for all of us. Her writing on nature, food and the environment is full of humour, while never shying from the hard facts. Louise gets to the heart of modern anxieties about where our meat comes from, asking an important question for our time - is it possible to be an ethical carnivore?

By only eating animals she has killed herself for a year, Louise Gray explores our relationship with the animals we eat and how we might reconnect with the natural world through food.

One woman's quest to find out what it really means to kill and eat animals.

If we want to improve the treatment of animals, Dominique Lestel argues, we must acknowledge our evolutionary impulse to eat them and we must expand our worldview to see how others consume meat ethically and sustainably. The position of vegans and vegetarians is unrealistic and exclusionary. Eat This Book calls at once for a renewed and vigorous defense of animal rights and a more open approach to meat eating that turns us into responsible carnivores. Lestel skillfully synthesizes Western philosophical views on the moral status of animals and holistic cosmologies that recognize human-animal reciprocity. He shows that the carnivore's position is more coherently ethical than vegetarianism, which isolates humans from the world by treating cruelty, violence, and conflicting interests as phenomena outside of life. Describing how meat eaters assume completely—which is to say, metabolically—their animal status, Lestel opens our eyes to the vital relation between carnivores and animals and carnivores' genuine appreciation of animals' life-sustaining flesh. He vehemently condemns factory farming and the terrible footprint of industrial meat eating. His goal is to recreate a kinship between humans and animals that reminds us of what it means to be tied to the world.

A vegan-turned-hunter reignites the connection between humans and our food sources and continues the dialog begun by Michael Pollan and Barbara Kingsolver. While still in high school, Tovar Cerulli experimented with vegetarianism and by the age of twenty, he was a vegan. Ten years later, in the face of declining health, he would find himself picking up a rifle and heading into the woods. Through his personal quest, Tovar Cerulli bridges disparate worldviews and questions moral certainties, challenging both the behavior of many hunters and the illusion of blamelessness maintained by many vegetarians. In this time of intensifying concern over ecological degradation, how do we make peace with the fact that, even in growing organic vegetables, life is sustained by death? Drawing on personal anecdotes, philosophy, history and religion, Cerulli shows how America's overly sanitized habits of consumption and disconnection with our food have resulted in so many of the health and environmental crises we now face.

Cats, dogs, & what it really means to be vegan.

'Compelling, illuminating and often confronting, On Eating Meat is a brilliant blend of a gastronome's passion with forensic research into the sources of the meat we eat. Matthew Evans brings his finflinching honesty - and a farmer's hands-on experience - to the question of how to be an ethical carnivore.' Hugh Mackay 'Intellectually thrilling - a book that challenges both vegans and carnivores in the battle for a new ethics of eating. This book will leave you surprised, engrossed and sometimes shocked - whatever your food choices.' Richard Glover How can 160,000 deaths in one day constitute a 'medium-sized operation'? Think beef is killing the world? What about asparagus farms? Or golf? Eat dairy? You'd better eat veal, too. Going vegan might be all the rage, but the fact is the world has an ever-growing, insatiable appetite for meat - especially cheap meat. Former food critic and chef, now farmer and restaurateur Matthew Evans grapples with the thorny issues around the ways we produce and consume animals. From feedlots and abattoirs, to organic farms and animal welfare agencies, he has an intimate, expert understanding of the farming practices that take place in our name. Evans calls for less radicalisation, greater understanding, and for ethical omnivores to stand up for the welfare of animals and farmers alike. Sure to spark intense debate, On Eating Meat is an urgent read for all vegans, vegetarians and carnivores.

An unprecedented scientific journey into the minds and experiences of grizzlies, sharks, rattlesnakes, crocodiles, and other carnivores we wrongly stereotype

From the Publisher: Jonathan Safran Foer spent much of his teenage and college years oscillating between omnivore and vegetarian. But on the brink of fatherhood-facing the prospect of having to make dietary choices on a child's behalf-his casual questioning took on an urgency. His quest for answers ultimately required him to visit factory farms in the middle of the night, dissect the emotional ingredients of meals from his childhood, and probe some of his most primal instincts about right and wrong. Brilliantly synthesizing philosophy, literature, science, memoir and his own detective work, Eating Animals explores the many fictions we use to justify our eating habits-from folklore to pop culture to family traditions and national myth-and how such tales can lull us into a brutal forgetting. Marked by Foer's profound moral ferocity and unvarying generosity, as well as the vibrant style and creativity that made his previous books, Everything is Illuminated and Extremely Loud and Incredibly Close, widely loved, Eating Animals is a celebration and a reckoning, a story about the stories we've told-and the stories we now need to tell.

Growing up in a household of food-loving Italian-Americans, Marissa Landrigan was always a black sheep—she barely knew how to boil water for pasta. But at college, she thought she'd found her purpose. Buoyed by animal rights activism and a feminist urge to avoid the kitchen, she transformed into a hardcore vegan activist, complete with shaved head. But Landrigan still hadn't found her place in the world. Striving to develop her career and maintain a relationship, she criss-crossed the U.S. Along the way, she discovered that eating ethically was far from simple—and cutting out meat was no longer enough. As she got closer to the source of her food, eventually even visiting a slaughterhouse and hunting elk, Landrigan realized that the most ethical way of eating was to know her food and prepare it herself, on her own terms, to eat with family and friends. Part memoir and part investigative journalism, The Vegetarian's Guide to Eating Meat is as much a search for identity as it is a fascinating treatise on food.
