The Far-Distant Oxus is a 1937 British children's novel by Katharine Hull (1921-1977) and Pamela Whitlock (1920-1982), written while they were still children themselves. The title is taken from Matthew Arnold's poem Sohrab and Rustum, and the characters in the story choose names from it for the places around them in the north coast of Devon; the real Oxus is a river in Central Asia.

The Far-Distant Oxus was written by two teenage girls, Katharine Hull and Pamela Whitlock, as an homage to their favorite author, Arthur Ransome of Swallows and Amazons fame. Ransome enjoyed their book so much that he recommended it to his publisher, who did in fact put it into print with an introduction by Ransome.

Reviewed in the United States on October 6, 2000 The Far Distant Oxus and it's sequels were among my favorite childhood books. I recently re-read them and was once again swept into a world in which children create their own adventures, a river, the forest, the moores are an invitation to adventure and life is filled with endless possibilities.

Not even in the novels of Arthur Ransome, to whom this was sent by its adolescent authors in 1937, whereupon he spurred its first publication (in a somewhat longer form).

The Far-Distant Oxus is a wonderful book! It is about the Hunterly children who go to spend the summer at a farm. They get to choose their own ponies and have excellent adventures on the moors. Some of the things they do include building a hut, hanging hammocks way up in trees, and going to the sea.

The Far-Distant Oxus, with Ransome's backing, was enough of a success for two sequels to be written and published, Summer at Oxus and Escape to Persia. Whereas Oxus has been republished twice in the last two decades, its sequels have yet to escape from rare book heaven.
