Hejaz railway - Wikipedia

The once-vast Hijaz Railway was originally designed to speed Muslim pilgrims from Damascus to the holy cities of Makkah and Medina but ended in ruins less than two decades after its start. Its sun-scalded remains can be seen today, cut adrift across northwestern Saudi Arabia in the form of sand-dusted rails, abandoned stations and rusted locomotives.

The Hijaz Railway - Visit Saudi Official Website

The Hejaz Railway was built on the order of Ottoman ruler Sultan Abdulhameed II on September 1st 1909 CE. (5th of Jumada first 1318 AH). The main objective of its construction was to serve the two Holy Mosques and provide a modern means to transport Pilgrims who came from Asia, Europe and the Levant to the Holy shrines in Makkah and Madinah, in addition to strengthen ties between the then fragmented Muslim World.

Hejaz Railway - UNESCO World Heritage Centre

The Hejaz Railway (also known in Turkish as the Hicaz Demiryolu) was a narrow-gauge railway (smaller than the usual railways at the time) and as mentioned prior was intended to run from Damascus to Makkah, through the Hejaz region of Arabia (modern day Saudi Arabia) with a branch line to Haifa (in Palestine) on the Mediterranean Sea.

The Hejaz Railway and Sultan-Caliph Abdülhamid II — Ammar ...

Railroads came late to the Middle East. By the end of the 19th century, there were just a few lines operating in the crumbling Ottoman Empire. Their military and political value had been recognized by far-sighted rulers, however, and this was the catalyst for the construction of a railway deep in the desert of the Hejaz region of what is now Saudi Arabia—a line that would be made famous in the West by Lawrence of Arabia.

The Hejaz Railway | Weapons and Warfare

Stretching between Damascus and the Hejaz region of the Arabian Peninsula, the site of the holy cities of Mecca and Medina, and with a branch line to Haifa, the railway was built by the Ottoman Empire between 1900 and 1908 to connect these far-flung regions of its realm. Auler's photos are important evidence of the construction in progress.

The Hejaz Railway: The Train That Connected an Empire

The Hejaz Railway (also spelled Hedjaz) was originally built to transport pilgrims from the city of Damascus in Syria to the city of Madina in Saudi Arabia. It was completed in 1908, but was severely damaged during the First World War (1914-1918) by Lawrence of Arabia and the Arab Revolt.

Travel the Hejaz Railway - Nabataea

The railway is the 1,300km track the Ottomans built in 1908 between Damascus and Medina, Islam's second-holiest site. A branch line connected the Mediterranean port of Haifa to the main line via...

Winding its way from Damascus through the vast desert wastes of Jordan and into the spectacular barren mountains of north-west Saudi Arabia, the Hejaz Railway was a testament to the fading, but still potent power of the Ottomans in Arabia.

Railway expansion was symbolic of modernization in the late 19th century, and Britain, Germany and France built railways at enormous speed and reaped great commercial benefits. In the Middle East, railways were no less important and the Ottoman Empire's Hejaz Railway was the first great industrial project of the 20th century. A route running from Damascus to Mecca, it was longer than the line from Berlin to Baghdad and was designed to function as the artery of the Arab world - linking Constantinople to Arabia. Built by German engineers, and instituted by Sultan Abdul Hamid II, the railway was financially crippling for the Ottoman state and the its eventual stoppage 250 miles short of Mecca (the railway ended in Medina) was symbolic of the Ottoman Empire's crumbling economic and diplomatic fortunes. This is the first book in English on the subject, and is essential reading for those interested in Industrial History, Ottoman Studies and the geopolitics of the Middle East before World War I.

This book, first published in 1971, details the Muhammad 'arif manuscript which propagates the project of the Hejaz railway connecting Damascus with Medina and Mecca. The project has been seen as a specific, dramatic example of the phenomenon of growing Arab nationalism during the early years of the twentieth century. Included here is an annotated edition of the Arabic manuscript, an English translation, and an extensive introduction with notes and historical setting. The 'arif manuscript gives a clear view of the struggle for reform in Turkey at the time when burgeoning Arab nationalism became an important factor in the railway project. Many aspects of Middle Eastern politics can be traced to basic factors described in the manuscript by 'arif.

Built in the turn of the twentieth century, the Hejaz Railway was initially mocked in Europe as a wildly improbable scheme. Still used partially in Syria and Israel, the railway was constructed at colossal cost and despite countless obstacles, it received great enthusiasm across the Muslim world. This book provides many details about the construction of this project based on British documents from a technical and cultural point of view.

Introduction -- Construction -- Financing -- Operations -- Impact upon society

The complex political and cultural relationship between the German state and the Ottoman Empire is explored through the lens of the Ottoman Railway network, its architecture, and material culture. With lines extending from Bosnia to Baghdad to Medina, the Ottoman Railway Network (1868–1919) was the pride of the empire and its ultimate emblem of modernization—yet it was largely designed and bankrolled by German corporations. This exemplifies a uniquely ambiguous colonial condition in which the interests of Germany and the Ottoman Empire were in constant flux. German capitalists and cultural figures sought influence

in the Near East, including access to archaeological sites such as Tell Halaf and Mshatta. At the same time, Ottoman leaders and laborers urgently pursued imperial consolidation. *Germany and the Ottoman Railways* explores the impact of these political agendas as well as the railways' impact on the built environment. Relying on a trove of previously unpublished archival materials, including maps, plans, watercolors, and photographs, author Peter H. Christensen also reveals the significance of this major infrastructure project for the budding disciplines of geography, topography, art history, and archaeology.

This atlas aims to provide the reader with key pointers for a spatial analysis of the social, economic and political dynamics at work in Jordan, an exemplary country of the Middle East complexities. Being a product of seven years of scientific cooperation between Ifpo, the Royal Jordanian Geographic Center and the University of Jordan, it includes the contributions of 48 European, Jordanian and International researchers. A long historical part followed by sections on demography, economy, social disparities, urban challenges and major town and country planning, sheds light on the formation of Jordanian territories over time. Jordan has always been looked on as an exception in the Middle East due to the political stability that has prevailed since the country's Independence in 1946, despite the challenge of integrating several waves of Palestinian, Iraqi and - more recently - Syrian refugees. Thanks to this stability and the peace accord signed with Israel in 1994, Jordan is one of the first countries in the world for development aid per capita.
