Read PDF The Impact Of Robots On Productivity Employment And Jobs

Robots are driving an increase in demand for workers at the higher-skilled end of the spectrum, with a positive impact on wages. The issue is how to enable middle-income earners in the lower-income range to upskill or retrain. Robots complement and augment labour: The future will be robots and humans working together.

~~The Impact of Robots on Productivity, Employment and Jobs~~
So yes, some jobs will be taken over by robots and other automation solutions, but robots will rather complement than replace people. A study by the International Federation of Robotics on The Impact of Robots on Productivity, Employment and Jobs (April 2018) confirms this point of view. Some of the main conclusions of the IFR ' s report are:
