Directed by Vandad Kashafi. 'The Life of Insects' will be a dark comedy based on the novel by Russian author Victor Pelevin. The film consists of parallel strorylines in the tradition of P.T. Anderson's 'Magnolia' creating a portrait of a time and place that is larger than the sum of it's parts.

The Life of Insects - IMDb

The Life of Insects is by Russian writer Victor Pelevin, and was first published in Russian in 1994, with the English translation following in 1996. I was attracted to the story by Pelevin's approach to combining human and insect traits at will; one moment a character is swimming in someone's food as a small insect, and the next they are plucked out and seated at the table as a full grown human.

The Life of Insects by Victor Pelevin - Goodreads

Victor Pelevin: (The Life of Insects) The most famous book about humans as insect is obviously Kafka 's Die Verwandliung (The Metamorphosis). This book has a somewhat different take on that theme in that the main characters are both insects and humans. We first meet Arthur on a balcony in Crimea, as a human.

Pelevin: The Life of Insects | The Modern Novel

The Life of Insects, Pelevin's new novel, takes a Kafkaesque premise and kneads it, logically. The characters in this book are both humans and various kinds of insect. They have human capacities and insects' weaknesses. They go to restaurants, drive cars, dance at parties, and discuss Marcus Aurelius.

Insects are mostly solitary, but some, such as certain bees, ants and termites, are social and live in large, well-organized colonies. Some insects, such as earwigs, show maternal care, guarding their eggs and young. Insects can communicate with each other in a variety of ways. Male moths can sense the pheromones of female moths over great distances.

Insect - Wikipedia

The author describes the fantastic social life of insects: how they compete and cooperate with each other, outwit their enemies, secure their prey, grow and multiply. It discusses insect physiology--functions of feeding, mating, their metabolism, their sensory perceptions--and finally explains the relationship of insects to plants..and to man.
