A peaceful land of farmers is conquered by a large army on a quest for new properties. The great Commander of that army establishes himself as the new governor and does everything he can to subjugate the defeated population and to remove any obstacle to his command over everything and everybody. Yet soon after, he finds out that there is still one man on the land who is able to beat him, a fearless old monk. But how can one old monk alone stand a chance before the Commander's heavily armed forces? If you're curious to know, join us to find out! The Commander and the Wise Monk is a short Buddhist tale about how simple teachings of innate compassion are more effective than any weapons, because, once awoken to its gentle wisdom, our heart guides our eyes, our actions in life and frees our minds.

Deep in the heart of Tibet, Shan Tao Yun, an exiled Chinese national and a former Beijing government Inspector, is caught between the brutal Chinese army and a Western oil company. Shan has agreed to lead an expedition to return the eye of an idol, stolen almost a century ago and recently, clandestinely recovered, to a distant valley, an act that will fulfill an important Tibetan prophecy. But the pilgrimage turns into a desperate flight when the monk who is to lead them is murdered. Shan also discovers that the stone was stolen back from a brigade of the Chinese army that is now in hot pursuit. Still possessing an investigator's love of truth, Shan faces a perplexing tangle of mysteries. Why are the Chinese so desperate to retrieve the stone eye, why has an American geologist abandoned the oil company's drilling project and fled into the mountains, and why are rumors sweeping the countryside that an ancient lama is returning to liberate this country? As he digs into these questions, Shan realizes that there is more at stake than mere justice: the spiritual survival of his people is in danger as well. Complex and compelling, Bone Mountain is a spectacular achievement from a major voice in crime fiction.

Eleven-year-old twins Oliver and Celia Navel could care less about adventure and they really do not like excitement. They'd rather be watching television. Unfortunately for them, their thrill-seeking parents have dragged them from continent to continent their entire lives. But when their mother goes missing and their father makes a bet with the devious explorer Sir Edmund, the twins are forced into action. They head to Tibet where they fall out of airplanes, battle Yetis, poison witches, and encounter one very large yak. If they can unravel the mysteries and outwit Sir Edmund, they might just make the discovery of a lifetime . . . and get cable television!

In about 25 BC tribesmen of the kingdom of Meroe placed a bronze head of Augustus, cut from a full-length statue, beneath the steps of a temple of victory: the decapitated head of the Emperor was thus regularly trampled underfoot. Two millennia later, during the second Gulf War, Iraqis 'insulted' a toppled bronze statue of Saddam Hussein by beating it with their shoes. Do these chronologically distant but apparently related examples of the defamation of images imply that the persons represented were regarded by their detractors as in some way 'present' in the images? Presence: The Inherence of the Prototype within Images and Other Objects reconsiders the notion of 'presence' in objects. The first book to address the issue directly, it contains a series of case studies covering a broad geographical and chronological range from ancient Greece and the Incas to industrial America and contemporary India, as well as examples from the canon of western European art. The studies reveal the widespread evidence for this striking form of response and allow readers to see how 'presence' is evoked and either embraced or repressed in differing historical and cultural contexts. Featuring a variety of disciplines and approaches, the book will be of interest to students of art history, art theory, visual culture, anthropology, psychology and philosophy.

Following the Shambhala Sutra—an ancient manuscript written by Penchen Lama over two hundred years ago—Laurence Brahm started his journey to Shambhala in Lhasa and continued deep into the harsh regions of Tibet. Shambhala Sutra presents Brahm's expedition across western Tibet's Ngari region where he learned that the ancient sutra was actually a metaphorical guidebook. He traces a route embedded with riddles through deserts and mountains. The lessons learned from this journey (as told in the sutra as a prophecy) are that shortsighted greed, war, and failure to protect our environment will cause kingdoms and empires to vanish. Mankind's future depends on ensuring a sustainable planet through more holistic economics, empowering communities and people, and preserving our environment. These are the messages hidden in the Shambhala Sutra.

His friends and family know and fear it. So when he sights a virgin peak in the Himalayas that exists on no map, no one is surprised when he becomes obsessed with being the first to scale it. Together with his climbing partner, Bill Taylor, they set off into a region of Tibet highly restricted by the Chinese. But a freak accident puts one of their team in mortal danger and it is left to a local Tibetan girl to lead them to Geltang, a monastery that has been hidden from the outside world since the Chinese Cultural Revolution, when most of the

monasteries were pillaged and burned. When the Chinese secret police get wind of them, Luca and Bill find themselves embroiled in an age-old struggle, not for their lives but to protect the precious secret that Geltang hides, and the legacy of Tibet itself.
