The unnamed narrator is alone in his house on a cold December evening, trying to read. As he is about to fall asleep, he hears a quiet knock at his door, but decides to ignore it. He says that he has been reading in the hopes of relieving his sorrow over Lenore, his beloved, who has passed away. Though he tries to convince himself that nothing is there, his curiosity and fear overwhelm him.

~~THE NEUROSES OF EDGAR ALLAN POE: A FEVER CALLED LIVING~~ By...

On Halloween night, Saturday Night Live employed Edgar Allan Poe's "The Raven" to tell the tale of the 2020 election during the latest episode's cold open. Jim Carrey's Joe Biden, confident in his electoral choices, read an altered version of the horror poem with notable characters popping in at the moment when the famed "nevermore" line was expected to hit, each bringing with them warnings ...

A history of the world through the lens of fever deals with the expression of fever, with the efforts of medical scientists to classify it, and with fever's changing social, cultural and political significance.

Volume 21 of *The Annual of Psychoanalysis* is especially welcome for bringing to English-language readers timely contributions from abroad in an opening section on "Psychoanalysis in Europe." The section begins with a translation of Helmut Thomae's substantial critique of the current state of psychoanalytic education; Thomae's proposal for comprehensive reform revolves around a redefinition of the status of the training analysis in analytic training. Diane L'Heureux-Le Beuf's clinical diary of an analysis focusing on the narcissistic elements of oedipal conflict probes the degree to which the analytic method can be applied to "nonstructured" analysands. And Nella Guidi shows the clinical value of supplementing Freud's notion of unobjectionable positive transference with the complementary notion of unobjectionable negative transference.

Section II, on "Psychoanalysis and Hysteria," offers original contributions to Freud scholarship in the form of Jules Glenn's reconsideration of Dora's "Dynamics, Diagnosis, and Treatment"; William McGrath's analysis of the way Freud's hostility to religious superstition gained expression in his early work on hysteria; and Marian Tolpin's self-psychological reprise on the case of Anne O. The section concludes with Elisabeth Young-Bruehl and Sarah Cummin's provocative "What Happened to 'Anorexie Hysterique'?" which questions the contemporary separation of anorexia from hysteria and explore the sociohistorical reasons the separation came about. Section III, "Clinical and Theoretical Studies," begins with Nancy Kobrin's discussion of Freud's ideas about autonomy, including the terms Freud used and the way Strachey translated them into English. Her goal is to deepen our understanding of how Freud spoke and thought about an individual's sense of self. Frank Summers shows how object relations principles, which are shared by various object relations theories, can inform the conduct of analysis at all levels of pathology, including neurosis. And Henry Smith examines the meaning and value of the "analytic surface," a metaphor that highlights the relationship between the analyst's attention and the patient's attention. A final section on "Applied

"Psychoanalysis" offers contemporary examples of applied analytic inquiry in anthropology, art, and literature. Roy Grinker, III and Roy Grinker, Jr., in a methodological contribution to psychoanalytic anthropology, examine what is revealed when a native people (here the Lese of northeastern Zaire in Africa) are asked to retell a story (here the story of Cain and Abel) introduced by them by their Western observers. Danielle Knafo explores the art and life of the Mexican surrealist Frida Kahlo through the concepts of the mirror, the mask, and the masquerade. And David Werman closes the volume with a comparative study of Edgar Allan Poe's and James Ensor's obsession with revenge, and the role it played in Poe's writing and Ensor's etchings, respectively. Bringing readers the influential reform proposals of Thomae, a rich sampling of recent Freud scholarship, applied contributions traversing three disciplines, and original clinical contributions reflecting American and European sensibilities, Volume 21 of *The Annual* is true to the spirit of this distinguished series. It testifies to the scope of analytic inquiry, and it exemplifies the yield of such inquiry in the hands of gifted scholars and clinicians.

This volume gathers and annotates all of the Shakespeare criticism, including previously unpublished notes and lectures, by the maverick American intellectual Kenneth Burke (1897–1993). Burke's interpretations of Shakespeare have had an impressive influence on important lines of contemporary scholarship; playwrights and directors have been stirred by his dramaturgical investigations; and many readers outside academia have enjoyed his ingenious dissections of what makes a play function. Burke's intellectual project continually engaged with Shakespeare's works, and Burke's writings on Shakespeare, in turn, have had an immense impact on generations of readers. Carefully edited and annotated, with helpful cross-references, Burke's fascinating interpretations of Shakespeare remain challenging, provocative, and accessible. Read together, these pieces form an evolving argument about the nature

of Shakespeare's plays and poems. Included are thirteen analyses of individual plays and poems, an introductory lecture explaining his approach to reading Shakespeare, and a substantial appendix of hundreds of Burke's other references to Shakespeare. Scott L. Newstok also provides a historical introduction and an account of Burke's legacy. Burke's enduring familiarity with Shakespeare likely helped shape his own theory of dramatism, an ambitious elaboration of the *teatrum mundi* conceit. Burke is renowned for his landmark 1951 essay on *Othello*, which wrestles with concerns still relevant to scholars more than a half century later; his ingenious ventriloquism of Mark Antony's address over Caesar's body has likewise found a number of appreciative readers, as have (albeit less frequently) his many other essays on the playwright. Burke's first and final pieces of literary criticism both examine Shakespearean plays, thereby bookending an impressive, career-long contribution to the field of Shakespeare studies. Among the many major Shakespearean critics who have gratefully acknowledged Burke's influence are Paul Alpers, Harold Bloom, Stanley Cavell, René Girard, Stephen Greenblatt, and Patricia Parker.
