When two brothers come together to dispose of their parents' estate, their divergent attitudes and dispositions become increasingly accentuated.

A “bracing and well-argued” study of America’s college debt crisis—“necessary reading for anyone concerned about the fate of American higher education” (Kirkus). College is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In *Paying the Price*, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent finished within five years. The cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school—not with a degree, but with crippling debt. Goldrick-Rab combines that data with devastating stories of six individual students, whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process, to a bold, public sector – focused “first degree free” program. “Honestly one of the most exciting books I've read, because [Goldrick-Rab has] solutions. It's a manual that I'd recommend to anyone out there, if you're a parent, if you're a teacher, if you're a student.”—Trevor Noah, *The Daily Show*

students--Patrick, the jock; Lisa, a manipulative tease; Cain, the brooding musician; and Martin, a scholarly eccentric--all of whom have their own reasons for remaining on campus, gradually become aware of a sixth ominous presence that may have its own terrifying agenda for them. A first novel. Reprint.

The title of this book indicates that the topic of discussion will be promiscuity and thus sin. Rather than dealing expressly with sin, its aim is to cover promiscuity from many viewpoints. It begins with the effect of promiscuity on empires and its contribution to their decline. It then compares modern Western civilization and morals of our time with those of previously collapsed civilizations. It then looks at the effect upon our individuality, especially the effect upon our body, and also demonstrates how our moral behaviour spills back into society. The book ventures into the most difficult areas of all, that is our mind and our soul. Finally, it attempts to offer practical advice on how to live a moral life.

Drawing on their extensive knowledge of the oil industry, Roberto F. Aguilera and Marian Radetzki provide an in-depth examination of the price of the world's most important commodity. They argue that although oil has experienced an extraordinary price increase over the past few decades, we have now reached a turning point where scarcity, uncertain supply and high prices will be replaced by abundance, undisturbed availability and suppressed price levels. They look at the potential of new global oil revolutions to bring the upward price push to an end and examine the implications of this turnaround for the world economy, as well as for politics, diplomacy, military interventions and the efforts to stabilize climate. This book will appeal to a wide readership of both academics and professionals working in the energy industry, as well as to general readers interested in the ongoing debate about oil prices.

Price of Power examines Henry Kissinger ' s influence on the development of the foreign policy of the United States during the presidency of Richard Nixon.
