~~The Science of Medical Marijuana~~

In addition to endocannabinoids, scientists have now identified cannabinoids found in the cannabis plant (phytocannabinoids) that work to mimic or counteract the effects of some endocannabinoids.

Phytocannabinoids and terpenes are manufactured in resin glands (trichomes) present on the flowers and main fan leaves of late-stage cannabis plants.

~~Cannabinoids: The Science Behind Medical Cannabis~~

Drug Science launched Europe's first and biggest national medical cannabis registry, called Project Twenty21, on the 7th November 2019. Project TWENTY21 aims to enrol 20,000 patients by the end of 2021, creating the largest body of evidence for the effectiveness and tolerability of medical cannabis – with an aim to demonstrate to policymakers that medical cannabis should be as widely available, and affordable, as other approved medicines for patients who would benefit from them.
