“ The Science of Parenting ” addresses this confusion by moving beyond the chatter and opinion surrounding parenting, and by looking directly at the science. Parenting itself is far from a science. Nevertheless, scientists have conducted thousands of studies that can help parents – or future parents – make sensible, informed decisions.

It uses brain science to show that attentive, gentle parenting is absolutely essential to a child's development and mental health, both presently and in the future. Some people will find parts of this book hard to hear and feel guilty knowing that they have parented their children in a way that may have been damaging to them in the past and it also may remind some of painful experiences from childhood.

The Science of Parenting by Margot Sunderland

Talking about the Science of Parenting | 7 Determinism: People believe that people 's parenting is determined by how they were parented as children and that there is little that can be done to change this pattern. This way of understanding is highly fatalistic and restricts people 's ability to see how programs to
