THE TASTE OF APPLE SEEDS BY KATHARINA HAGENA (Atlantic £12.99) By Harry Ritchie for MailOnline. Published: 13:05 EDT, 10 January 2013 | Updated: 13:05 EDT, 10 January 2013 .

Shimmering with the incandescence and irresistible magic of the novels of Alice Hoffman, Joanne Harris, and Aimee Bender, Katharina Hagena's smash international bestseller, The Taste of Apple Seeds, is a story of love and loss that will captivate your heart. When Iris unexpectedly inherits her grandmother's house in the country, she also inherits the painful memories that linger there. Should she keep it or sell it? The choice is not easy, for the cottage is a place of enchantment and sensual mystery where currant jam tastes of tears, blue sparks crackle at the touch of fingertips, love makes apple trees bloom-and dark secrets pulsate in the house's nooks and shadows. . . .

For Iris, childhood memories are of long hot summers spent playing with her cousin Rosmarie in her grandmother's garden, a place where redcurrants turned to pale tears on the branches of trees and beautiful Aunt Inga shook sparks from the tips of her fingers. But now her grandmother is dead and, along with inheriting the property, Iris finds that she also inherits her family's darkest secrets. Reluctant to keep it, but reluctant to sell, Iris spends one more summer at the house. By day she swims at the local lake, where she rediscovers a childhood companion. Alone at night she roams through the familiar rooms, exploring the tall black shadows of the past. In the flicker between remembrance and forgetting, Iris recalls an enigmatic grandfather who went to war and came back a different man, the night her cousin Rosmarie fell through the conservatory roof and shattered her family's lives, and a moment of love that made the old tree in the orchard bloom overnight.

From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters-generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty-come to life in all their human uniqueness, free from idealization.

An essay on the wild apple gives the history of the fruit and discusses its growth, beauty, names and flavor through the seasons

A guide to tracking down, identifying and preserving rare apples.

The book that helped make Michael Pollan, the New York Times bestselling author of How to Change Your Mind, Cooked and The Omnivore's Dilemma, one of the most trusted food experts in America Every schoolchild learns about the mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers' genes far and wide. In The Botany of Desire, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires-sweetness, beauty, intoxication, and control-with the plants that satisfy them: the apple, the tulip, marijuana, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings. And just as we've benefited from these plants, we have also done well by them. So who is really domesticating whom?

"For all of us who cherish the apple, its utility, its flavors, and its powers of revelation and connection." -Adrian Higgins, garden columnist, The Washington Post The apple is one of the most iconic fruits, traditionally picked on cool fall days and used in pies, crisps, ciders, and more. And there is a vast world of varieties that goes well beyond the common grocery store offerings. With names like American Beauty, Carter's Blue, and Fallawater, and flavors ranging from sweet to tart, this treasure trove of unique apples is ripe for discovery. There is no better guide through this tasty world than Tom Burford, whose family has grown apples in the Blue Ridge Mountains since 1715. His celebratory book Apples of North America is brimming with beautiful portraits of heirloom and modern apples of merit, each accompanied by distinguishing characteristics and common uses. You will also find information on growing apples at home-with specifics on planting, pruning, grafting, and more-and instructions on how to preserve apples through pressing, fermenting, cooking, and drying.
