"The Wall" tells the story of Hadrian's Wall, its makers, its effect and its impact on northern Britain. With more than 24 million stones, its mass is greater than all of the Egyptian pyramids, and its scale is almost beyond grasp. 30,000 soldiers and craftsmen worked for 10 years to complete it, and when the great sea-wall down the Cumbrian coast was completed, it stretched for around 120 miles. Native kings must have shuddered at this amazing barrier.

Nothing else approaches its vast scale: a land wall running 73 miles from east to west and a sea wall stretching at least 26 miles down the Cumbrian coast. Many of its forts are as large as Britain's most formidable medieval castles, and the wide ditch dug to the south of the Wall, the vallum, is larger than any surviving prehistoric earthwork.

The Antonine Wall was perhaps the most advanced example of a Roman linear frontier. There was no sense that it would be a short-lived expedient. Vici , the familiar civil settlements, quickly grew up and, beside the walls of the fort at Carriden, the inhabitants seem to have been particularly independent-minded.

There is more than a metaphor in this juxtaposition. A native structure built inside the rectilinear streets and walls of a Roman fort by men who probably spoke Old Welsh but regarded themselves as part of the armies of the Empire. Clearly life on the Wall had been changing long before the end of the province and the break with Rome. ECHOES OF ROME
