~~Whole Brain® Thinking | Herrmann~~

Herrmann Whole Brain Model: Four thinking styles. Every person has the ability to handle situations in different ways. The Herrmann Whole Brain model groups the thinking styles into four quadrants: A, B, C, and D. The model is based on a metaphorical model of the brain, with the left and right hemisphere, as well as the and limbic and reptile brain.

~~booklet - Whole Brain Thinking~~

The second takeaway about whole brain thinking is that we need to understand that the design of our brain affects the way we learn. Learning actually creates new neuronal connections. As learning professionals, it is essential to have a solid foundation of knowledge about the brain to effectively drive learning outcomes.

~~THINKING~~

In his brain dominance model, Herrmann identifies four different modes of thinking: A. Analytical thinking. Key words: logical, factual, critical, technical, quantitative. Preferred

activities: collecting data, analysis, understanding how things work, judging ideas based on facts, criteria and logical reasoning. B. Sequential thinking.

~~Herrmann Brain Dominance Instrument - Wikipedia~~

Whole brain learning is a model of learning where learners learn a concept by using both parts of the brain and not just left or the right brain. This is the simplest definition I could frame as I did not want to use a technical university-based definition in my very first article. A picture speaks a thousand words, or is it?

~~Understanding the Whole Brain Child - Guilty Mother~~

This may allow scientists to build artificial models of explicit brain functions and experiment with mechanisms of injury and repair at a cellular or molecular level. Such mapping may aid our understanding of brain function and recovery and guide the rebuilding of brain circuits or resection of dysfunctional brain cells rather than whole tissues.
