We don't recommend placing the speaker bar above your TV or somewhere else in the room. For the optimal sound experience, it should be right below your TV set, should not be tilted, and it should align and face vertically with your TV screen.

A 7.1 system adds left and right rear surround speakers. A 9.1-channel system adds front height speakers to take advantage of Dolby Pro Logic® Hz, which derives height information from the signal. Dolby Atmos layouts add height speakers to the traditional 5.1 and 7.1 surround sound setups.

[Dolby Atmos Setup Guides - Dolby](#)

Once you've set them to stand apart from each other at least 150 cm, set them to stand 30 cm away from the rear wall. Move the speakers away from the rear wall towards the listener (left and right image below) until you find the ideal position. Also, move the speakers toward the sidewalls and listen to the difference.
