A technical and commercial compendium on the manufacture, preserving, packing and storage of all food products.

An extremely practical book that offers methods of prevention and management strategies, and provides a comprehensive view of the problem of violence and aggression from patients/clients. This book, based on sound research, is cleverly structured so that the notion of violence becomes more explicit with each succeeding chapter, until finally the violent outburst arrives. This innovative book explores a topical, vital subject that appeals to a variety of nurses and other professionals.

CD-ROM includes video files of material discussed in text.
