NEW EDITION! (October 2018). The proven system of trade--based on Structural Target Patterns (ST Patterns)--presented in this book is able to bring a monthly profit equal to 100% or more (on average) of the deposit amount. To be successful in today's Forex, Futures, Indices, Commodities and other liquid markets, most of the knowledge and trading techniques accumulated over the last two centuries are not needed at all. The technical portion of a profitable trading system only needs to include the ST Patterns method. This method of assessing market movements by using target models gives traders clear and unambiguous signals regarding their actions in the present moment. The graphic figures presented here build upon each other iteratively to create a clear picture of market conditions. Unlike the claims of the most popular technical and fundamental analysis methods, the trading system in this book does not predict market behavior. I no longer need any predictions about prices because their movements have become obvious to me. Following the ST Patterns strategy, managing trading positions becomes simple. It took me many years to establish and improve this trading system, and now it is ready to be used by you. I believe that, at the very least, this book can save traders' time and

The month following the book's «Trading Code is Open» publication perfectly demonstrated the possibilities of using the trading system and showed how almost half of the ST Patterns published in this book operate in practice. The technical analysis presented in «Forex Strategy: ST Patterns Trading Manual, EUR/USD Chart Analysis Step by Step, 300% for One Month» book, based on accurate calculations, will help traders consolidate the acquired knowledge, and to increase their own skills with Structural Target Patterns. The study of the GBP/USD pair will help readers understand the importance of determining periods of market uncertainty in a timely fashion. To demonstrate the flexibility of the strategy settings and the formation of short-term uncertainty periods, the EUR/USD pair is shown on five-minute charts in one working day on May 31. For nine hours of work, the result was approximately + 82% of the initial deposit.
