How to choose a flash unit. When you are going to choose a flash, there some basic factors you should consider: Knowing In what type of photography you are planning to use a flash. Understanding the jargon and terms used in flash specifications, so you can objectively compare different flash units. Finally, find the best price that suits your budget.

How To Use Flash In Photography- The Full Guide - Ehab ...

Understanding flash power. To fully understand studio lighting, you need to understand power. Each type of studio light has different power capabilities and it is important to understand how to use this power if you want full creative control. This photography class covers all you need to know about flash power, including the relationship between f-stops and studio light power, why it's important (but not necessarily crucial) to have a large range of power and the factors that influence power.

Photography studio lighting, understanding flash power

While the videos take place in a studio setting, the two core things learned in this course, How flash works, and how to think about using flash, can be applied when using flash in any setting or shooting environment. You simple need to envision how you want the final shot to look, and then use your flashes, and what they've learned in the course, to achieve the desired effect.
